

SaveOnSP

Save On Your Specialty Drug Prescriptions

Through your prescription drug plan with Medical Mutual, your employer has provided you access to the SaveOnSP program, which helps you save money on specialty drugs. Specialty drugs are medications that require special handling, administration or monitoring and are often used to treat rare, complex and chronic conditions. More than 200 specialty drugs are currently included in the SaveOnSP program.

How Does SaveOnSP Work?

If you are prescribed a specialty drug, the program can save you money by maximizing prescription drug copay assistance from pharmaceutical manufacturers. Your 30-day prescriptions will still be filled through one of our specialty network pharmacies, including Accredo, University Hospitals of Cleveland Specialty Pharmacy or Gentry Health Services. By participating, your out-of-pocket cost will be as low as \$0 for medications included in the program.

How Do I Participate?

If you currently take a specialty drug, a SaveOnSP representative will call you to explain how the program works and help you enroll in the manufacturer's copay assistance program. Participation involves allowing SaveOnSP to share information with your specialty drug pharmacy. It's easy and only takes a few minutes. You can also call SaveOnSP at 1-800-683-1074.

If you choose not to participate, you will be responsible for 30% coinsurance which will not be applied to your deductible or out-of-pocket spending and will still be charged even after your deductible or out-of-pocket has been satisfied. Enroll with SaveOnSP to avoid this penalty.

If you have questions, call the Rx Information number listed on your Medical Mutual member ID card.
